AVT-1

Anti-Vibration Table For High Magnification Microscopy

The Anti-Vibration Table (AVT) features an anti-vibration mechanism for passive dampening of the microscope. This is mainly used for *In vitro* Fertilization (IVF) or Intra-Cytoplasmic Sperm Injection (ICSI) procedures. Exclusively designed in Denmark and made in E.U., the stainless steel table and sturdy frame add mass to the anti-vibration table. AVT-1 is constructed to be easy to use and almost maintenance free.
